Raghid Shreih (MSc, MBA, CLP)

Technology & Innovation Leader | Delivering Business Value
Through Product & Strategy

Qatar

Summary

I'm a technology leader with 20+ years of experience transforming ideas into impactful solutions. My career spans high-growth startups and global enterprises such as Google, Shopify, and Aramco, where I've delivered programs that accelerate technology adoption and commercialization.

With a strong technical foundation (B.Sc. in Computer Engineering, M.Sc. in Electrical Engineering) and an MBA, I combine deep technical expertise with strategic vision. My work covers diverse domains: AI, software systems, semiconductors, telecommunications, oil & gas, renewable energy, advanced materials, and more.

I thrive at the intersection of technology, innovation policy, and entrepreneurship, leveraging Agile methodologies to lead teams, manage complex programs, and drive efficient execution of technology programs. Skilled in IP strategy, negotiation, technology evaluation, and investment decision-making, I enable collaborations that transform technology into real-world impact.

Let's connect if you're passionate about technology leadership, innovation, and building solutions that shape the future.

Experience

Hamad Bin Khalifa University
Research Commercialization Manager
June 2025 - Present (10 months)
Doha, Qatar

- Led commercialization of AI-driven technologies from research through proof-of-concept, prototyping, pilot deployments, and commercial deployment through licensing or spinouts
- Acted as a strategic interface between researchers, industry partners, startups, and legal/IP teams to translate deep tech into market-ready solutions
- Evaluated technology readiness levels (TRLs) for emerging AI research and defined technical and commercial roadmaps to reach market deployment
- Designed and executed proof-of-concept and pilot programs to validate AI solutions with early industry customers
- Translated complex AI research (LLMs, NLP, data platforms, decision systems) into clear value propositions for non-technical stakeholders
- Developed end-to-end commercialization plans including market analysis, customer discovery, competitive positioning, and go-to-market strategy
- Conducted customer validation interviews and pilot evaluations to de-risk technology and identify product-market fit
- Identified high-potential use cases for AI adoption across government, enterprise, SMB, and consumer market segments
- Built business cases for spinouts, licensing deals, and industry partnerships
- Acted as an internal advisor to researchers on venture creation, startup readiness, and fundraising narratives

Shopify

Staff Technical Program Manager & Solution Engineer

July 2021 - August 2025 (4 years 2 months)

- Leadership of complex technical programs to build solutions that accelerate the success of Shopify's largest and most strategic merchants and partners.
- Leading professional services projects to migrate some of the world's leading brands to Shopify.
- Driving the technical solutioning aspect of the Enterprise Sales process by understanding technical needs and challenges and designing customized solutions that address pain points and demonstrate value and a positive ROI.
- Partnering with senior leadership and C-level executives internally and externally to communicate, influence, and build trust.
- Managing technical integrations to bridge Shopify, merchant, and 3rd party functionality to deliver delightful user experiences.
- Coordinating programs across multiple internal and external teams, managing risks and dependencies, and driving progress towards successful launches.

Startup Canada London

Startup Community Leader
July 2022 - January 2023 (7 months)
London, Ontario, Canada

Building and leading "Startup Canada London", a startup community in London, Ontario affiliated with Startup Canada.

Startup Canada is the leading national non-profit organization supporting and giving a voice to entrepreneurs through online programs, national awards, flagship events, and partnerships with private sector and government to foster a community for startup and small business success across the country. Startup Canada Communities support and connect grassroots networks to fuel a culture and environment for entrepreneurship at the local level.

Aramco
Technology Commercialization Lead
2019 - 2021 (2 years)

- Leading early stage technology programs from the research lab to internal and external commercial deployment
- Developing IP commercialization plans through market research to refine the competitive advantage of each technology and develop a go-to-market strategy
- Defining and managing pilot and demonstration projects in collaboration multiple stakeholders to scale-up technologies
- Leading strategic technology programs through formulating and presenting plans and recommendations to senior management
- Negotiation of technology collaboration and commercialization agreements

Sustainable Development Technology Canada - Technologies du développement durable Canada
Technology Screening and Evaluation Manager
2018 - 2019 (1 year)
Canada

- Led the successful investment of nearly \$15 million to support technology commercialization of early stage clean technology projects
- Evaluation of the technology, intellectual property, commercialization potential, management capacity, business plan, financial strength and

market opportunity of more than 50 companies to select the most promising investment opportunities

- Performing due diligence activities and preparation of investment summaries for each recommended investment opportunity
- Presenting investment recommendations to SDTC's investment committee consisting of senior industry executives
- Support portfolio companies through implementation of their technology commercialization plans and technology demonstration projects

Google

3 years

Program Manager

September 2016 - March 2018 (1 year 7 months)

San Francisco Bay Area

- Leadership of a team of software engineers developing a complex enterprise software system
- Developing project plans outlining milestones, dependencies and risks
- Managing complex project dependencies across a cross-functional team
- Coordinating efforts across product management, software engineering, testing and the end user to ensure project alignment
- Successful management of FixIt and Demo Days events to fix bugs and showcase new product ideas
- Managed resource planning and allocation for the Customer Engagement team
- Interfacing with multiple end user teams, collecting user requirements, coordinating user acceptance tests, user training and launch timelines
- Managing communications with all stakeholders to ensure relevant teams are informed and consulted during development
- Developing SQL scripts and reporting data dashboards for business analysts
- Agile methodologies including Scrum and Kanban to manage team progress

Technical Advisor & Competitive Intelligence Analyst

April 2015 - September 2016 (1 year 6 months)

San Francisco Bay Area

- Contributing to Google's strategy to protect, defend and capture the value of its patents, including working on patent strategy, licensing, acquisition, deals and policy work.

- > Managed Google's participation in the Industry Patent Purchase Promotion (IP3) program leading to the acquisition and licensing of 56 patent families with a total budget of \$5.3 million
- > Competitive intelligence research to guide Google's patent acquisition and licensing strategy in key technology areas
- > Analysis of competitor patent portfolios to provide intelligence informing patent licensing, acquisitions and divestitures
- > Advanced analytics of large sets of patent data using internal and external tools including machine learning tools
- > Patent landscaping to guide Google's patenting strategy in key technology areas
- > Market research and competitive analysis to ensure Google's market leadership and freedom-to-operate
- > Represented Google's patent team at CES 2016

KAUST

Technology Portfolio Manager

2012 - 2015 (3 years)

- > Managed a portfolio of 80+ technologies, 190+ patents, and 25 agreements
- > Portfolio of technologies spanned across electronics, semiconductors, sensors, thermoelectric devices, MEMS, Smart Cities and Oil & Gas exploration and drilling
- > Managed proof-of-concept projects for early-stage technologies
- > Developed a new proof-of-concept funding program, outlining a formal process for proposing, evaluating, approving and monitoring new projects
- > Improved internal patenting procedures resulting in faster patent grants
- > Drafted the office's first template license agreement for use by the entire team
- > Negotiated complex patent licensing and research collaboration agreements
- > Delivered IP training to new employees and KAUST startups
- > Developed high quality technology marketing content targeted at potential industry partners

Canadian Intellectual Property Office | Office de la propriété intellectuelle du Canada

5 years 9 months

Patent Examiner

January 2007 - September 2012 (5 years 9 months)

Gatineau, Quebec, Canada

- Permanent member of the PEPAG (Patent Examination Practices Advisory Group)
- Applied knowledge of the Patent Act and Rules to daily examination activities
- Gained experience examining Canadian patent applications, identifying defects and writing examination reports
- Applied knowledge of PCT Rules and regulations to examination of PCT applications
- Gained experience preparing International Search Reports and International Preliminary Examination Reports for PCT applications
- Successfully completed the following patent related training courses:
 - Three month basic training course on patent examination
 - One month advanced training course on advanced topics including re-examination, re-issue, patent litigation, and study of relevant court cases
 - ISA / IPEA training relating to PCT applications

Project Coordinator - Patent Examination Practice

September 2009 - September 2010 (1 year 1 month)

Gatineau, Quebec, Canada

- Led a project to revise office policy and practice related to computer inventions
- Chaired and facilitated team meetings
- Lead discussions on complex issues related to patent policy
- Developed a project schedule and ensured that deadlines were met
- Managed both internal and external consultation processes

Global Intellectual Strategies

Senior Patent Analyst & Account Manager

June 2011 - April 2012 (11 months)

Ottawa, Canada

- Client Account Manager supporting clients to obtain maximum value from their patent portfolios
- Leadership of reverse engineering projects to detect patent infringement
- Business Development through writing, negotiating and winning proposals with current and prospective clients
- Managed key client accounts contributing more than half of company revenues
- Providing Patent Portfolio Management, IP Licensing Support, Infringement Analysis, Reverse Engineering, Patent Landscapes, Patent Reviews and Prior Art Search

Meriton Networks

FPGA Designer

2004 - 2006 (2 years)

Ottawa, Canada

- Lead Designer for several Xilinx FPGAs and Lattice CPLDs through entire design cycle
- Gained Expert knowledge of Xilinx and Lattice design tools
- Implemented the control path for the control card, line card and switching fabric card in an optical networking switch
- VHDL was used for both RTL design and verification of FPGA and CPLD projects
- Programming of 8051 microcontrollers using C, gaining experience in real-time programming and debugging
- Exposure to board level schematic and layout design concepts

WebHostingSeeker.Com

Founder and Manager

2000 - 2006 (6 years)

- Built WebHostingSeeker.Com from the ground up using PHP/MySQL, HTML and CSS
- The platform allowed web site owners to search for and find web hosting plans
- Promoted the platform to web hosting companies and potential web hosting clients
- Developed server side PHP application to allow storing and searching for web hosting plans, as well as creating accounts and authenticating users
- Sold the web site in 2006

Department of Electronics, Carleton University

Electronics Teaching Assistant

September 2003 - April 2005 (1 year 8 months)

Ottawa, Canada

- Selected as the head TA for the digital electronics and microprocessor labs
- Involved in training other TA's for running the lab and holding lab preparation sessions for the students
- Digital electronics lab comprised of a major FPGA design project using Verilog HDL and Xilinx tools
- Presented several tutorial sessions relating to other aspects of the course material
- Responsible for marking assignments, lab reports and examinations

- Responsible for providing individual help to students during designated office hours

Ideal Hosting

Web Development & Hosting Business Owner

February 2000 - September 2003 (3 years 8 months)

Ottawa, Canada

- Assisted clients in building, hosting and maintaining their web sites
- Developed database-driven and e-commerce solutions customized to client needs
- Served a client base of 100+ clients before selling the business
- Gained in-depth web development experience using PHP/MySQL, Javascript, HTML, and CSS

Zarlink Semiconductor

ASIC Design Engineer

May 2002 - September 2002 (5 months)

Ottawa, Canada

- Designed an embedded C program to locate and monitor a TFO channel within an incoming 3G data stream
- Used Matlab to generate a random data stream with embedded TFO messages to test the software
- Designed a Verilog HDL version of the same project
- Used VCS simulator, Virsim waveform viewer and Coverage metrics to verify the RTL design
- Gained knowledge of the Tandem Free Operation (TFO) specification for GSM and 3G networks

Galazar Networks

ASIC Verification Engineer

August 2001 - January 2002 (6 months)

Ottawa, Canada

- Designed test cases in Verilog to verify RTL designs
- Gained experience using Synopsys VCS, Signal Scan and coverage metrics
- Applied and expanded my knowledge of SONET/SDH

Quake Technologies

Digital ASIC Designer

January 2001 - May 2001 (5 months)

Ottawa, Canada

- Designed test cases in Verilog to verify the RTL design according to a test plan
- Developed several Perl scripts to simplify verification
- Gained knowledge of SONET and the IEEE 802.3 standard for 10GB Ethernet

RoweBots Research Inc

Software Developer

May 2000 - September 2000 (5 months)

Ottawa, Canada

- Developed a Windows program for managing meetings using Visual Basic / Visual Studio
- Developed custom solutions for clients including the Mayor's Office at the City of Ottawa
