

Purpose: You will build a web site called raghidshreih.com. This is a professional career oriented web site for a person named Raghid Shreih. The intention of the web site is to showcase Raghid's professional accomplishments and to serve as an interactive and more detailed resume. I have attached Raghid's resume as one source of information. The second source of information is Raghid's LinkedIn page: www.linkedin.com/in/raghid.

Key Features:

The web site should have the following features:

- It should be visually attractive, eye-catching, and immersive
- It should be smooth and fast-loading, and should avoid technical bloat and overly complex technology
- It should have the following pages:
 - Main page
 - About Me
 - Resume
 - Key Projects
 - Blog
 - Contact
- The content of each page is as follows:
 - **Main Page:** A brief introduction about Raghid. Should be professional but also a bit funny and not too formal. Should invite employers to hire Raghid and explore the other pages to learn more about him. A youtube video will be embedded at the top with a short video introduction.
 - **About Me:** More details about Raghid with a focus on his life journey and personal side of things. Should include an embedded youtube video and perhaps room for some photos as well.
 - **Resume:** The resume section should be a professional but eye catching and interactive resume that includes the content from the attached resume and the linkedin page. It should have a creative way to present the content along the timeline rather than just being a big long block of text. There should be a link to download the regular resume as well for recruiters, in both PDF and plain text formats.
 - **Key Projects:** This page will include a list of the key projects and most exciting projects that Raghid has worked on. It will span his entire career. Each project will include a title, short text description, and an embedded video discussing it.
 - **Blog:** The blog section will include Raghid's posts from LinkedIn as well as potentially other unique content. Each post could have an associated embedded video.
 - **Contact:** Includes some contact methods including LinkedIn and a contact form to avoid showing the email publicly.
- The entire site needs to be eye catching and innovative as a showcase of Raghid and should definitely not be boring.
